CONTENTS

Volume 31, Issue Nos. 1–8 (1999)

International Journal for
NUMERICAL METHODS IN FLUIDS

Issue No. 1, 15 September

SPECIAL ISSUE: Tenth International Conference on Finite Elements in Fluids, Tucson, Arizona

Preface: M. Hafez and J. C. Heinrich 1

New Approaches to Error Estimation and Adaptivity for the Stokes and Oseen Equations: J. T. Oden and S. Prudhomme 3

A Posteriori Finite Element Error Bounds for Non-linear Outputs of the Helmholtz Equation: J. Sarrate, J. Peraire and A. Patera 17

Parallel Finite Element Solution of Three-dimensional Rayleigh-Bénard-Marangoni Flows: G. F. Carey, R. McLay, G. Bicken, B. Barth, S. Swift and A. Ardelea 37

Sensitivities, Adjoints, and Flow Optimization: M. D. Gunzburger 53

A Discontinuous *hp* Finite Element Method for the Euler and Navier–Stokes Equations: C. E. Baumann and J. T. Oden 79

Applications of Unstructured Hybrid Grid Method to High-Reynolds Number Viscous Flows: K. Nakahashi, D. Sharov, S. Kano and M. Kodera 97

The Numerical Simulation of Strongly Unsteady Flow with Hundreds of Moving Bodies: R. Löhner, C. Yang, J. D. Baum, H. Luo, D. Pelessone and C. M. Charman .. 113

A Compact High-Order Unstructured Grids Method for the Solution of Euler Equations: R. K. Agarwal and D. W. Halt 121

A Conservative Box-Scheme for the Euler Equations: J.-J. Chattot 149

A Parallel Framework for Multidisciplinary Aerospace Engineering Simulations Using Unstructured Meshes: K. Morgan, N. P. Weatherill, O. Hassan, P. J. Brookes, R. Said and J. Jones 159

Tetrahedral Finite-Volume Solutions to the Navier–Stokes Equations on Complex Configurations: N. T. Frink and S. Z. Pirzadeh 175

Adaptive Finite Element Computations of Complex Flows: D. Pelletier 189

A General Procedure for Deriving Stabilized Space–Time Finite Element Methods for Advective–Diffusive Problems: E. Oñate and M. Manzán 203

Transitions and Interactions of Inviscid/Viscous, Compressible, and Laminar/Turbulent Flows: T. J. Chung 223

An Efficient Parallel Algorithm for Three-Dimensional Analysis of Subsidence Above Gas Reservoirs: B. A. Schrefler, X. Wang, V. A. Salomoni and G. Zuccolo 247

Estimation of Boundary Conditions for Ground Temperature Control Using Kalman Filter and Finite Element Method: K. Suma and M. Kawahara 261

Application of *h*-Adaptation for Environmental Fluid Flow and Species Transport: D. W. Pepper and D. B. Carrington 275

Adaptivity in Space and Time for Shallow Water Equations: M. Morandi Cecchi and F. Marcuzzi 285

A Higher-Order Covolume Method for Planar Div–Curl Problems: R. Nicolaides and D.-Q. Wang 299

A Unified-Grid Finite Volume Formulation for Computational Fluid Dynamics: S. Chakravarthy 309

Simulation of Steady Compressible Flows Based on Cauchy/Riemann Equations and Crocco's Regulations. Part II. Viscous Flows: M. Hafez and W. Guo 325

Finite Elements for CFD – How Does the Theory Compare? A. J. Baker, D. J. Chaffin, J. S. Iannelli and S. Roy 345

The Characteristic-Based-Split Procedure: An Efficient and Accurate Algorithm for Fluid Problems: O. C. Zienkiewicz, P. Nithiarasu, R. Codina, M. Vázquez and P. Ortiz 359

The Use of Overset Meshes in Particle and Porous Media Three-Dimensional Flows: H. A. Dwyer, K. DeBus and N. Shahcheraghi 393

Numerical Simulation of Incompressible Flow Driven by Density Variations During Phase Change: E. McBride, J. C. Heinrich and D. R. Poirier*

CONFERENCE DIARY 407

ANNOUNCEMENT 410

* Owing to circumstances beyond our control, this paper must be deferred to a future issue.

Issue No. 2, 30 September

Numerical Solution of the Three-Dimensional Fluid flow in a Rotating Heterogeneous Porous Channel: M. A. Havstad and P. Vadasz 411

High Resolution NVD Differencing Scheme for Arbitrarily Unstructured Meshes: H. Jasak, H. G. Weller and A. D. Gosman 431

Three-Dimensional Linear Stability Analysis of Incompressible Viscous Flows Using the Finite Element Method: Y. Ding and M. Kawahara 451

MOSQUITO: An Efficient Finite Difference Scheme for Numerical Simulation of 2D Advection: A. Balzano 481

Mesh Adaptation Strategies for Shallow Water Flow: M. Marrocu and D. Ambrosi 497

Natural Convection Heat Transfer in the Annular Region Between Porous Confocal Ellipses: E. Saatdjian, R. Lam and J. P. B. Mota 513

The Designing Approach of Difference Schemes by Controlling the Remainder-Effect: Liu Ruxun, Zhang Mengping, Wang Ji and Liu Xiao-Yuan 523

Issue No. 3, 15 October

The Influence of Topographic Features and Density Variations Upon the Internal Tides in Shelf Edge Regions: J. Xing and A. M. Davies 535

Prediction of Turbulent Gas–Solids Flow in Curved Ducts Using the Eulerian–Lagrangian Method: S. Naik and I. G. Bryden 579

Modelling of Two-Dimensional Laminar Flow Using Finite Element Method: R. Jurjević 601

The General Boundary Element Method and Its Further Generalizations: S. Liao ... 627

A Method for Obtaining Benchmark Navier–Stokes Solutions: M. C. Wendl 657

Issue No. 4, 30 October

The Numerical Simulations of Explosion and Implosion in Air. Use of a Modified Harten's TVD Scheme: T. G. Liu, B. C. Khoo and K. S. Yeo 661

On High-resolution Schemes for Solving Unsteady Compressible Two-phase Dilute Viscous Flows: N. Thevand, E. Daniel and J. C. Loraud 681

Calculation of Three-dimensional Turbulent Flow with a Finite-volume Multigrid Method: C. Cornelius, W. Volgmann and H. Stoff 703

Time Evolution of Laminar Flow Over a Three-dimensional Backward-facing Step: T. P. Chiang and T. W. H. Sheu 721

Implicit Weighted Essentially Non-oscillatory Schemes for the Incompressible Navier–Stokes Equations: Y.-N. Chen, S.-C. Yang and J.-Y. Yang 747

Numerical Study of Turbulent Flow over Two-dimensional Surface-mounted Ribs in a Channel: R. R. Hwang, Y. C. Chow and Y. F. Peng 767

Issue No. 5, 15 November

Numerical Simulation of Incompressible Flow Driven by Density Variations During Phase Change: E. McBride, J. C. Heinrich and D. R. Poirier 787

Application of the Lattice-Boltzmann Method to Study Flow and Dispersion in Channels with and without Expansion and Contraction Geometry: R. Kumar, S. S. Nivarthi, H. T. Davis, D. M. Kroll and R. S. Maier 801

A CFD Euler Solver from a Physical Acoustics–Convection Flux Jacobian Decomposition: J. Iannelli 821

Mixed Boundary Elements for Laminar Flows: M. Ramšak and L. Škerget 861

Upwind Schemes and Large Eddy Simulation: T. K. Sengupta and M. T. Nair 879

Fast Boundary-Domain Integral Algorithm for the Computation of Incompressible Fluid Flow Problems: M. Hriberšek and L. Škerget 891

CONFERENCE DIARY 909

Issue No. 6, 30 November

Parallel Solution of Three-Dimensional Marangoni Flow in Liquid Bridges: M. Lappa and R. Savino 911

The Solution of Two-Dimensional Free-Surface Problems Using Automatic Mesh Generation: R. C. Peterson, P. K. Jimack and M. A. Kelmanson 937

Comparison of Extended and Ensemble Kalman Filters for Data Assimilation in Coastal Area Modelling: H. Madsen and R. Cañizares 961

An Unsteady Incompressible Navier-Stokes Solver for Large Eddy Simulation of Turbulent Flows: W.-W. Kim and S. Menon 983

Lattice-Boltzmann and Finite-Element Simulations of Fluid Flow in a SMRX Static Mixer Reactor: D. Kandhai, D. J.-E. Vidal, A. G. Hoekstra, H. Hoefsloot, P. Iedema and P. M. A. Sloot 1019

ANNOUNCEMENT 1035

Issue No. 7, 15 December

Improvement and Generalization of a Finite Element Shallow-Water Solver to Multi-Layer Systems: J. Macías, C. Pares and M. J. Castro 1037

Solution of the Incompressible Navier-Stokes Equations on Domains with One or Several Open Boundaries: F. Bertagnolio 1061

Finite Element Study of Vortex-Induced Cross-Flow and In-Line Oscillations of a Circular Cylinder at Low Reynolds Numbers: S. Mittal and V. Kumar 1087

An Adaptive Least-Squares Method for the Compressible Euler Equations: F. Taghaddosi, W. G. Habashi, G. Guèvremont and D. Ait-Ali-Yahia 1121

Preconditioned Krylov Subspace Methods Used in Solving Two-dimensional Transient Two-phase Flows: M. Nordsveen and R. Moe 1141

A Local Grid Refinement Method for Three-Dimensional Turbulent Recirculating Flows: G. Papadakis and G. Bergeles 1157

A Boundary Element Analysis of Multiply-Connected Three-dimensional Cavity Mixing Flow of Polymer Solutions: R. E. Khayat 1173

Issue No. 8, 30 December

Discrete Filters for Large Eddy Simulation: P. Sagaut and R. Grohens 1195

A Multi-Level Adaptation Model of Circulation for the Western Indian Ocean: C. Shaji, N. Bahulayan, S. K. Dube and A. D. Rao 1221

Comparison of Using Cartesian and Covariant Velocity Components on Non-orthogonal Collocated Grids: Y. Wang and S. Komori 1265

Numerical Prediction of the Formation of Goertler Vortices on a Concave Surface with Suction and Blowing: M. H. Lin and G. J. Hwang 1281

Consistent Petrov-Galerkin Finite Element Simulation of Channel Flows: T. W. H. Sheu and S. F. Tsai 1297

Simulation of Three-Dimensional Bubbles Using Desingularized Boundary Integral Method: Y. L. Zhang, K. S. Yeo, B. C. Khoo and W. K. Chong 1311

A Numerical Model for Run-up of Breaking Waves: H. Johnsgard 1321

An Experimental and Numerical Investigation of Container Filling with Viscous Liquids: M. F. Tomé, S. McKee, L. Barratt, D. A. Jarvis and A. J. Patrick 1333
